#### Allowable Subject Matter

7. The following is an examiner's statement of reasons for allowance: Claims 1-34 are allowable. The prior art of record does not teach a reductive alkylation method for glycopeptides, using the method of first combining an aldehyde or ketone, base, and the glycopeptide to provide a reaction mixture, then acidifying the reaction mixture, and subsequently adding a reducing agent to produce an alkylated glycopeptide at the saccharideamine. The closest prior art of record, Berglund et al. U.S. Patent 5,998,581 teaches the reductive alkylation of glycopeptide antibiotics using copper to enhance the regioselective alkylation of glycopeptides at the saccharide-amine.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
